# About Us

AMERSEC® Shoplifting Prevention Systems has been providing advanced security products to the retail sector since 1996. Our company focus is to develop, manufacture, and supply products with the highest quality and performance that will grant you the security you expect for your stores! Our ongoing development reflects the trends of the market which results in an extensive product and design range. We are proud to be a European company with production fully based in Europe.

Our Acousto-Magnetic systems use the latest technology to protect your articles and also provide you with valuable online data and store activity information. AMERSEC® offers you a range of advanced and reliable solutions for merchandise protection with benefits such as small label protection, wide aisles and very reliable operation. Make a choice from the several types of solutions we offer to find your most cost-effective protection customized to your needs. Together with the online StoreMonitor data management and remote maintenance services our systems will help you to maximize store efficiency and safeguard the profits of your business.

## ADVANTAGES:

- wide design range including acrylic antennas
- single pedestal (MONO), aisle (TX/RX), and Loop technology available
- remote tuning and data collection enabled
- visitor counting enabled
- low energy consumption
- wide aisle solution
- jammer detection
- CE and FCC approved products, low emissions guaranteed

## AMERSEC® Acousto-Magnetic solutions

## CONTROLLER SYSTEM

Our AM Controller system is an advanced software-driven system capable of excellent detection of soft labels and tags. With good resistance to interference and intuitive software diagnostics, the AM Controller system is an ideal choice for any store. The main controller unit of the system can support up to six pedestals which makes large or multiple exits very cost-effective. Remote service via internet is available for long-distance support and retail chains which require complete system information can benefit from the AMERSEC® StoreMonitor services which automatically send important system data to the client's online account.

## BENEFITS:

**CONNECTIVITY:** remote tuning, data collection

**COST EFFECTIVENESS:** compatibility with ACE systems, low consumption

**SMART BEHAVIOUR:** visitor counting, jammer detection

**PERFORMANCE:** extra-wide exits up to 340 cm

# ACE SYSTEM

AMERSEC® AM ACE systems combine the best of our Acousto-Magnetic technology with cost effectiveness in a wide range of designer pedestals. This system does not require a controller unit creating new possibilities for easy installation in any store. Our AM ACE system can secure up to two aisles with just one system. Use the AM ACE as a single MONO system in a checkout configuration, or use it to protect stores where space is limited. Advanced software diagnostics, easy synchronization and excellent tag and label detection parameters are among many other features AMERSEC® ACE systems have to offer.

## BENEFITS:

- **CONNECTIVITY:** remote tuning, data collection
- **COST EFFECTIVENESS:** compatibility with CONTROLLER systems, low consumption
- **SMART BEHAVIOUR:** visitor counting, jammer detection
- **PERFORMANCE:** extra-wide exits up to 340 cm
- **SIMPLE REQUIREMENTS:** no controller unit

# LOOP SYSTEM

The AMERSEC® AM LOOP system offers a discreet shoplifting prevention solution for retailers who do not wish or cannot obstruct the store entrance with traditional EAS pedestals. The AM LOOP consists of a cable which runs through the floor and the door frame to conceal it from view. Small units are mounted on the door frame and act as receivers as well as visual and sound indicators. The system is controlled by our AM Controller Unit which can be placed up to 8 m from the LOOP system.

## BENEFITS:

- **DESIGN:** concealed system
- **CONNECTIVITY:** remote tuning, data collection
- **SMART BEHAVIOUR:** jammer detection
- **COST EFFECTIVENESS:** low consumption

## Your store - Your choice

As a European manufacturer we guarantee top quality of all AMERSEC® pedestals. With a focus on every detail we have built one of the largest range of pedestal designs on the market. Our pedestals range from aluminum to solid acrylic designer antennas that are available in several colors to match your store's interior. At AMERSEC® design and construction unite in one unique product.

## DESIGNS

# Security you can rely on

# INTEGRATED SOLUTIONS

If you are experiencing loss due to booster bag theft or unauthorized tag removal we recommend to upgrade your AMERSEC® shoplifting prevention system with Metal and Magnet Detection. We offer several solutions that range from simple foil-bag detection to advanced programmable systems that combine booster bag and magnetic detacher detection with learning mode to block sliding door interference. All of these upgrades can be integrated into AMERSEC® Acousto-Magnetic pedestals to enhance the security level in your store and customize your shoplifting prevention system to your exact needs.

## Avoid seeing these in your store!

 METALSPY detects a person who carries a booster bag inside the store.

 An alarm will alert shop personnel immediately

 You act before a theft occurs

# What is your store attendance?

# VISITOR COUNTING

Visitor Counting has become an important tool for measuring **store efficiency** as well as for strategic planning by all retailers. AMERSEC® **Inbuilt** Visitor Counting offers you a smart way of integration with AMERSEC® pedestals and together with our online **StoreMonitor software solution** it will provide you with all essential details on your store attendance.

 **Integrated Solution**

 **Online data management**

 **Store efficiency measuring**

 **Strategic planning**

# SMART DEACTIVATION

AMERSEC® **STANDARD** Deactivators combine reliable soft label deactivation with Next Generation system features such as remote maintenance and data collection. Our range of AM Deactivator pads gives you the opportunity to choose from a line of slim-built desk-top and desk-insertable units. Additionally each of our AM Deactivators is equipped with a key lock for controlled access. The **STANDARD** Deactivator can also be integrated with a scanner or a self-operated POS.

# TAGS AND LABELS

Consumables such as security hard tags and soft labels are commonly available on the market. AMERSEC® has tested and sourced the highest quality consumables to ensure compatibility with our systems so that your articles are securely protected at favourable prices. By not using AMERSEC® branded consumables, your new security system might be compromised.

# Is your security system online?

# STOREMONITOR

AMERSEC® software solutions are designed to collect vital data and status information from our Visitor Counters, MetalSpy and MetalMagnetSpy systems as well as EAS systems. Along with extensive counter analytics, our online StoreMonitor solution offers you information on system alarm counting, system status reports, and management of system working hours. The collected data are shown in detailed reports displayed in graphs or tables for evaluation of store efficiency or sales strategy. Additionally the software enables comparisons with other store locations or different time periods and can be automatically sent to your email or uploaded onto a FTP server in scheduled reports.

## BENEFITS:

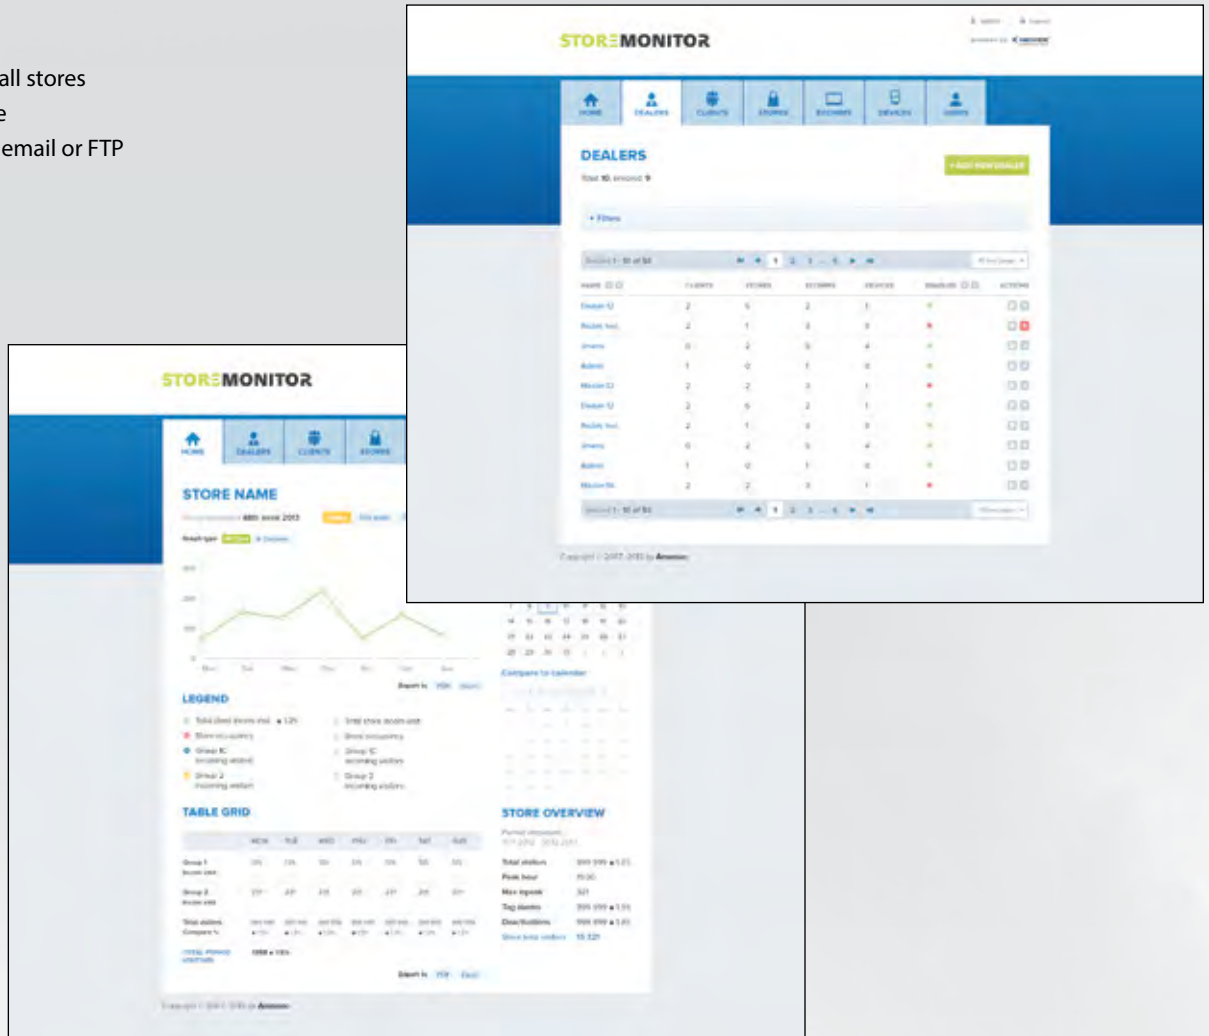

- online solution
- detailed overview of all stores
- user friendly interface
- scheduled reports to email or FTP

ONLINE SOLUTION

DETAILED OVERVIEW OF ALL STORES

USER FRIENDLY INTERFACE

SCHEDULED REPORTS TO EMAIL OR FTP

# Need immediate support?

# REMOTE MAINTENANCE

With our online diagnostics software, technicians are able to immediately service your system and solve most technical issues should any arise. Remote service saves time, costs and significantly reduces the number of store visits.

## BENEFITS:

- online solution
- fast service call response
- cost effectiveness
- immediate results
