Tablet and phone not included.

Star Micronics EMEA

"The NEW ultimate and unique peripheral for merchants requiring a Bluetooth combined printer and cash drawer."

Bluetooth®

NEW mPOP

THE MOBILE POINT OF PURCHASE SOLUTION

Outstanding connectivity and design, plus intuitive functionality and simple integration are delivered ready to work with your chosen, mobile, software and card payment system. Welcome to a new era for mPOS.

Tablet and phone not included.

The World's 1st Bluetooth Combined 58mm Printer and Cash Drawer

Advanced mobile devices and app software have opened up new avenues for retailers. At Star Micronics we've developed the world's first conceptually driven, combined point of purchase cash drawer and printer in response to the need for an easily integrated mobile POS system. In the **mPOP** we've created something that's aesthetically simple and elegant, yet loaded with intuitive design features. At just 10cm high and 30cm wide it's easily transportable, whilst the Bluetooth connectivity means only one mains cable is needed for full operation.

mPOP works with all major mobile operating systems including Apple iOS, Android and Windows, giving retailers the freedom to use the platform that works for them.

iOS

ANDROID APP ON Google play

Available on the App Store

The multiple functions and connectivity of the mPOP make processing customer transactions smooth and effortless for outlets such as bars and cafés, florists and pop up shops. The sleek design will complement any counter top or, for an even less intrusive look, it can be secured underneath a countertop.

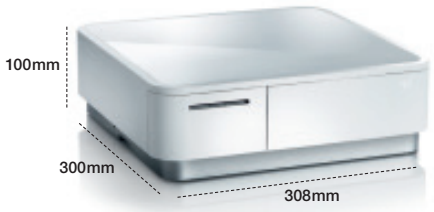
mPOP

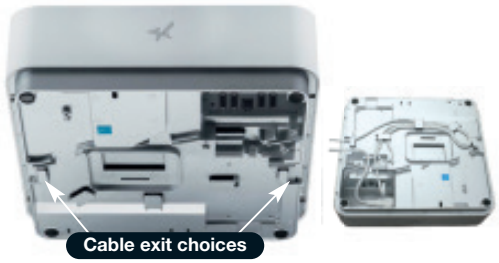
Use with YOUR choice of mobile device.

(Available Qtr 3 2015)

▶ Compact, stylish and functional

Just 10cm high and 30cm wide, the mPOP unit will sit happily in retail and hospitality environments providing receipts and change for your sale. Just add the latest third party card pin pad to your set-up.





▶ Effective cable management

Enhanced cable routing and various cable exit options maintain the sleek design in your retail environment.

mPOP Reliable 100mm/second printer

with intuitive top loading & easy front feed, the printer uses traditional direct thermal receipt paper which does not need ribbons or toner and is readily available. The partial cut guillotine automatically cuts the 58mm wide receipt so it won't drop on the floor. Simple paper loading – just push the front printer panel and press the easy release lever to drop in the paper roll and then print.

mPOP Functional but compact cash drawer

A clean, fast drawer release reveals 6 or 8 coin holders capable of taking full bank bags of coins and 4 upright note dividers. Higher value notes can be stored securely under the coin inserts and a software lock provides extra security.

mPOP Classic Bluetooth Connectivity

Choose the mobile device of your choice – Android, Apple, Linux or Windows tablet/smartphone for simple Bluetooth pairing. The mPOP LED display will quickly let you know pairing status as well as any issues such as paper out etc.

mPOP Compact, mobile POS design

for the retail environment is further enhanced by the need for just one single mains cable for all mPOP functions. One or two external device chargers are included as well as the Star scanner which can be included at purchase or bought at a later date. USB connectivity ports are neatly positioned in a recess in the base of the unit, offering quick and easy access as well as providing its own secure cable management… ***simply plug in and go!***

mPOP Security

– a secure counter clip is supplied to help protect the mPOP unit when used above the counter along with the 3rd party Kensington™ lock facility. The under-counter mount kit option will enable you to position the mPOP unit in a more secure environment if preferred.
